## Corporate Environmental Policy

Our primary commitment is to protect the environment and ensure its sustainability. In line with this commitment, we pledge to comply fully with all applicable environmental laws, regulations and other requirements, to control and minimize the environmental impacts arising from our activities, and to continuously improve our environmental performance. Our goal is to meet today's needs while leaving a clean, healthy and livable environment for future generations.

- ✓ To ensure full compliance with **environmental legislation, customer requirements and all relevant obligations**, and to continuously improve and enhance our environmental performance.
- ✓ To systematically assess **environmental impacts** in all construction projects; and to implement environmentally responsible methods during planning, execution and operational phases.
- ✓ To **minimize waste at its source**, prevent pollution, maximize recycling opportunities, and ensure that non-recyclable waste is disposed of safely and without harming the environment.
- ✓ To increase environmental awareness by providing **regular environmental training** for our employees, suppliers and subcontractors and by promoting a culture of sustainability across all operational levels.
- ✓ To promote and support efficient use of natural resources by reducing **energy, water and raw material consumption** throughout our activities.
- ✓ To identify environmental risks, maintain readiness for potential emergencies, and operate an effective **environmental risk management system**.
- ✓ To periodically review our environmental performance and environmental management system, adopting **continuous improvement** as a fundamental principle.

This policy reflects our corporate commitment to environmental responsibility, sustainability, legal compliance, and continuous improvement across all our activities.
